CAREER EXPLORER

Find a role that fits you

Explore the skills, technologies, and career options for each role.

Full Stack Developer

Build the user-facing and server-side parts of web applications.

HTML | CSS | JavaScript | React

₹3–7 LPA
estimated fresher CTC

Software Developer

Design, build, test, and maintain software applications.

Java or C++ | OOP | DSA | SQL

₹3–7 LPA
estimated fresher CTC

Python Developer

Use Python to build applications, automation scripts, APIs, and backend services.

Python | OOP | SQL | APIs

₹3–7 LPA
estimated fresher CTC

Data Analyst

Turn raw data into reports, dashboards, and useful business insights.

Excel | SQL | Power BI | Data cleaning

₹3–6 LPA
estimated fresher CTC

AI / ML Engineer

Develop and evaluate machine-learning systems and AI-powered applications.

Python | Statistics | Machine learning | Data preparation

₹4–10 LPA
estimated fresher CTC

Cloud Engineer

Deploy, monitor, and maintain cloud infrastructure and services.

Linux | Networking | AWS or Azure | Scripting

₹4–8 LPA
estimated fresher CTC

Cybersecurity Analyst

Help monitor systems, investigate security alerts, and reduce cyber risks.

Networking | Linux | Security fundamentals | Logs

₹3–7 LPA
estimated fresher CTC

Software Tester / QA Engineer

Check software quality by designing tests, finding defects, and verifying fixes.

Testing fundamentals | Test cases | Bug reports | SQL basics

₹3–6 LPA
estimated fresher CTC

DevOps Engineer

Improve software delivery through automation, deployment pipelines, and observability.

Linux | Git | CI/CD | Cloud

₹4–9 LPA
estimated fresher CTC

UI/UX Designer

Design clear, accessible, and useful digital experiences through research and prototyping.

Design principles | Wireframes | Prototyping | User research

₹3–7 LPA
estimated fresher CTC

Mobile App Developer

Build and maintain applications for Android, iOS, or cross-platform devices.

Kotlin or Dart | UI basics | APIs | State management

₹3–8 LPA
estimated fresher CTC

Data Engineer

Build reliable pipelines that collect, transform, and prepare data for analysis.

SQL | Python | Data modelling | ETL/ELT

₹4–9 LPA
estimated fresher CTC

A company appearing here does not mean it currently has an open vacancy for every listed role. Hiring criteria vary by job and recruitment drive.

LEARN STEP BY STEP

Beginner learning roadmap

Choose a path, track your progress, and print the plan when you're ready.

Choose your career path

Select a role to see a suggested learning sequence. Progress is saved in this browser.

Full Stack Developer

- [ ] **1. HTML & CSS**
  Build semantic pages, layouts, and responsive designs.
- [ ] **2. JavaScript fundamentals**
  Practise variables, functions, arrays, DOM, and events.
- [ ] **3. Git and GitHub**
  Track code changes and publish a repository.
- [ ] **4. Frontend framework**
  Learn React components, props, state, and routing.
- [ ] **5. Backend & APIs**
  Learn Node.js/Express or a Python backend and REST APIs.
- [ ] **6. SQL & databases**
  Design tables, write queries, and connect application data.

How to turn learning into job readiness

01 **Learn the fundamentals**
Study one topic at a time and practise consistently.

02 **Build real projects**
Create 2–3 projects and explain your own contribution.

03 **Publish your work**
Keep your GitHub repositories clear, documented, and runnable.

04 **Prepare and apply**
Practise fundamentals, resume explanations, and mock interviews.

Suggested timelines are flexible. Your pace will depend on your starting knowledge and practice time.

- [ ] **7. Portfolio project**
  Build, test, document, and deploy a complete application.

- [ ] **8. Interview preparation**
  Practise JavaScript, problem solving, and project explanations.

DISCOVER YOUR DIRECTION

Quick career-fit quiz

Answer three questions to get a few career paths to explore.

1. What do you enjoy most?

- ○ Building websites or applications
- ○ Working with data, numbers, and reports
- ○ Systems, networks, and security
- ○ Design and user experience
- ○ Python, maths, and AI experiments

2. How much coding do you prefer?

- ○ A lot of coding
- ○ Some coding
- ○ Little coding

3. Your current level

- ○ Beginner
- ○ I know the basics
- ○ I have built projects
